## RiskyProject: Your easy to use Monte Carlo schedule risk analysis solution

---

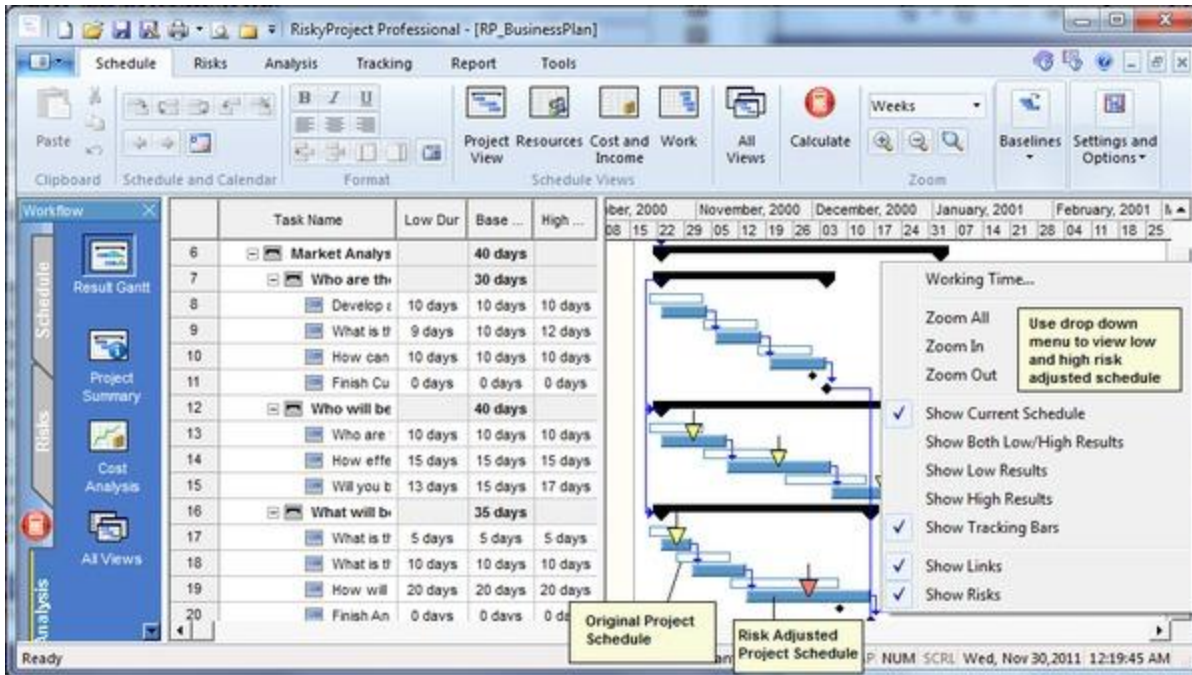

### December Discount – Buy 1 license of RiskyProject Professional and Get a second for 50%

For the month of December, If you purchase one license, you can have a second license at 50% off the retail price of RiskyProject Professional! [Send an email to our sales](#) staff who will help you take advantage of this offer. With easy to understand graphs and visualizations, you can see how risks will affect project cost, schedule and other parameters.

---

### RiskyProject Tip of the Day

The **Result Gantt** view allows you to compare your original project schedule (white bars) with the forecasted results from the Monte Carlo simulation. You can view the simulation results for each activity or your project.

## Integration with Primavera

RiskyProject is designed to easily integrate with Oracle Primavera P3 and greater. RiskyProject can read project data created in Primavera into Microsoft Project XML format and perform quantitative risk analysis on your project in 2 easy steps.

1. Export your Primavera schedule as an mpx or Microsoft Project xml file.
2. Import your project schedule into RiskyProject and perform the risk analysis.
