

Free Webinar:**Risk Management and Risk Analysis
for Oil and Gas Projects**

www.intaver.com

In today's market, the difference between success and failure, profit and loss is your company's ability to understand how critical risks will affect your projects:

- Time is money, see how risks will affect your costs and schedule.
- By minimizing risk exposure oil and gas companies may significantly improve their bottom line.
- Schedule and cost risk analysis provides a the basis for improved risk planning and project management.

Join Intaver Institute's **free webinar** and see how leading oil and gas producers perform risk analysis and risk management using RiskyProject software. RiskyProject can provide a practical and proven approach to oil and gas projects:

- Identify and prioritize risks that will impact project success;
- Analyze project schedules with risks and uncertainties;
- Create risk management plans to minimize risk exposure;
- Create accurate risk aware project schedules.
