## **RiskyProject: Project Risk Software**

Project Risk Analysis and Risk Management

[www.intaver.com](http://www.intaver.com)

# **Free Webinar: Why you should be running Monte Carlo risk analysis**

Running Monte Carlo simulations on project plans can often seem like an unnecessary added burden on the project team. Monte Carlo risk analysis requires additional expertise, effort and tools to perform, but the benefits are often not well understood. In this webinar, we will discuss the benefits of running Monte Carlo simulations as well as when it is indicated. Learn how Monte Carlo is the best method to:

- Generate risk adjusted project baseline
- Estimate project contingency
- Prioritize project risks for risk management

**Date:** Tuesday, September 5th, 2017

**Time:** 10:00 AM – 11:00 AM MST (UTC-07:00)

## **RiskyProject 7: Improved risk analysis and enterprise risk management**

This summer we released RiskyProject Version 7. Version 7 includes RiskyProject Professional, Lite, Enterprise and our new module RiskyProject Risk Register. Version 7 is a comprehensive upgrade to the RiskyProject software suite with many new features and improvements in our desktop software along with critical new features to support Enterprise Risk Management (ERM).

[Read more about Version 7](#)

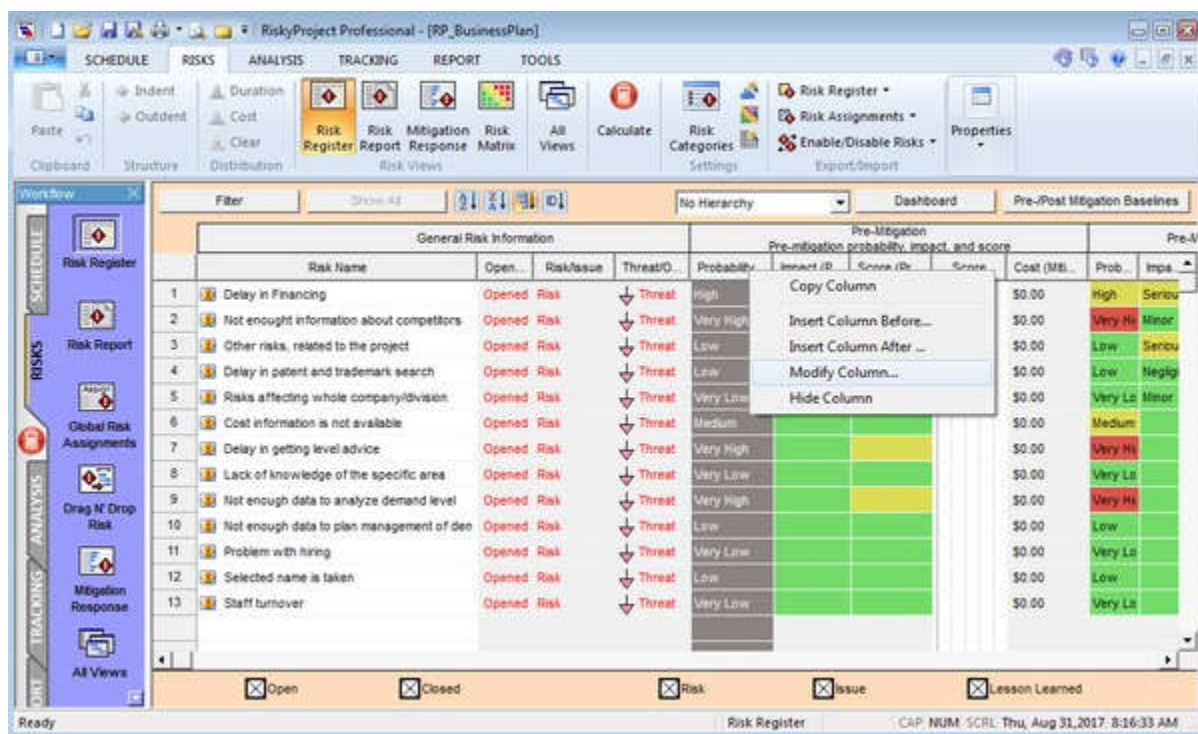

All our clients who purchased RiskyProject after June 1, 2016 or on a maintenance plan can upgrade your RiskyProject version free of charge. Otherwise you may purchase [an upgrade](#).

## Tips and Tricks

### Customizing the Risk Register

The Risk Register provides a flexible tool from which to identify, assess, and report on your project risks. The risk register is composed of columns. They represent the various risk properties that you want to capture as part of your risk management process. While RiskProject comes with a variety of common properties, you can add, delete, or modify properties and then configure the risk register by adding columns (properties) to the view. Risk Register properties can include probabilities and impacts, risk assessment data, management strategy information, etc.

## Upcoming Webinars

### Introduction to the RiskyProject Risk Register

RiskyProject Enterprise offers a new Risk Register module that simplifies qualitative risk analysis and management. This can be useful in cases where projects do not meet thresholds for qualitative analysis or in cases where detailed cost and schedule estimates are not available at the program or portfolio level. This webinar will show you how to

- Set up the risk register module so it is optimized for qualitative risk analysis,
- Identify and assess risks
- Create risk plans
- Generate reports

**Date:** Tuesday, November 7th, 2017

**Time:** 10:00 AM – 11:00 AM MST (UTC-07:00)
