## **Analyzing and Managing Risks in Project Portfolios: An Introduction to Portfolio Risk Analysis**

Managing risks in project portfolios as opposed to individual project schedules provides a number of significant benefits:

- Consistent and continuous risk analysis of all projects within a portfolio using common set of risks
- Ranking projects within a portfolio based on risk
- Rolling up project risks and ranking them at the portfolio level
- Managing risk mitigation efforts across a project portfolio

This webinar provides an introduction on how to analyze and manage risks in project portfolios and how RiskyProject software can provide the capability to help you perform project portfolio risk analysis and management. You will learn:

- How to create risk registers that can be shared between different projects within a portfolio
- How to assign enterprise risks to different projects
- How to calculate total risk probabilities and impacts if risk is assigned to multiple project within a portfolio
- How to present and report results of portfolio risk analysis

Tuesday, July 7, 2015

Time: 10:00 AM - 11:00 AM MDT

## The Risk Lifecycle in RiskyProject

As part of its risk management capability, RiskyProject allows you to manage the risks through the entire risk lifecycle continuously from identification to lesson learned. This easy to follow process ensures that not only are your critical risks identified and planned around, but also that you can provide ongoing monitoring and control so that you can deliver your projects on time and budget.
