RiskyProject 6: Enterprise Project Risk Management and More

RiskyProject 6 marks the introduction of RiskyProject Enterprise. RiskyProject Enterprise is a server/desktop system that provides portfolio/program level risk analysis and management.

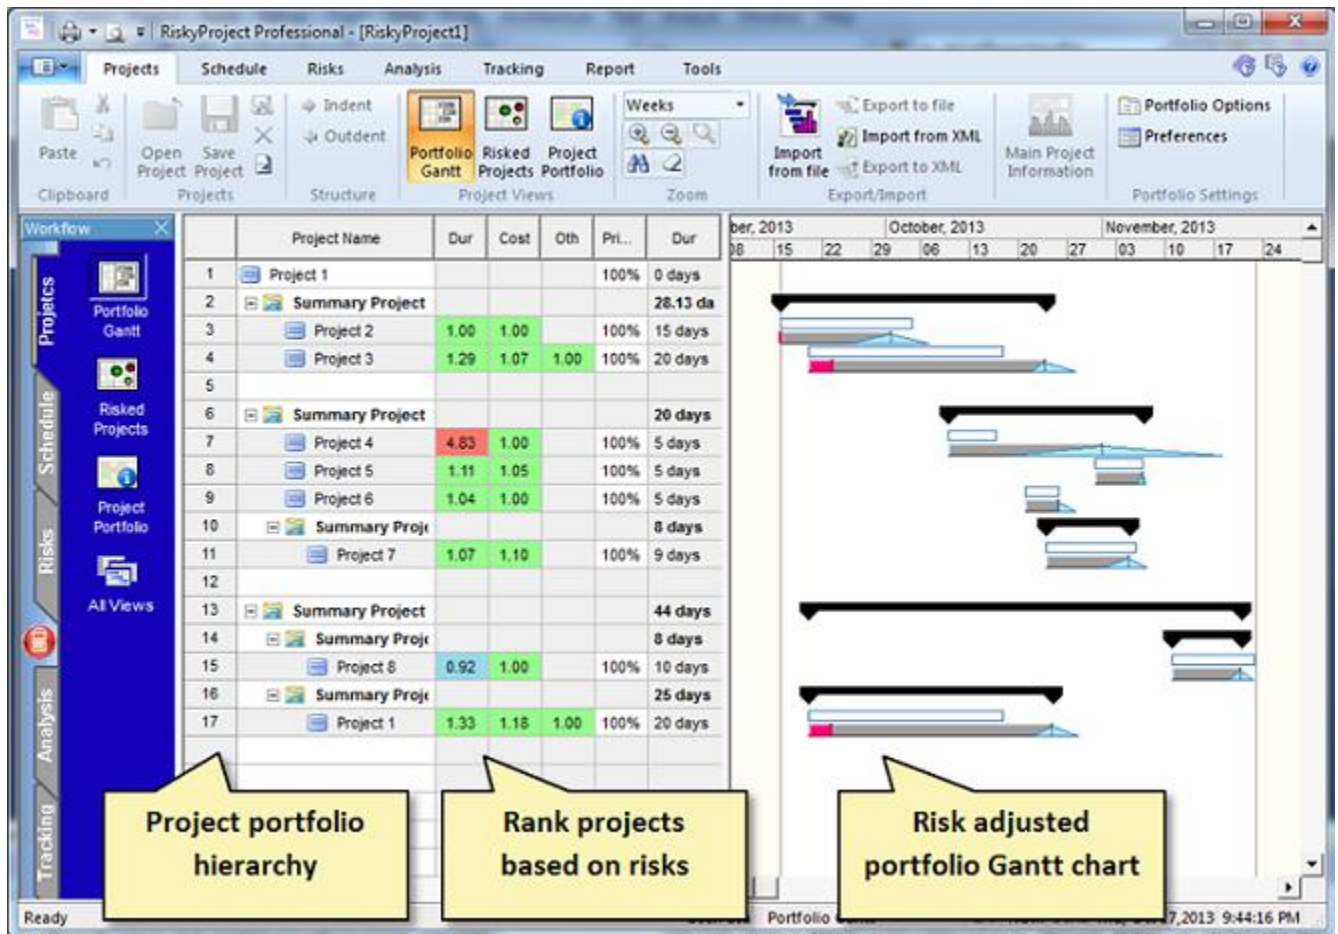

Portfolio risk management:

- organization-wide risk register
- risk ranking for portfolio, programs, and projects
- project portfolio hierarchy
- rank your projects based on their risks
- organization-wide response and mitigation plans
- manage the risk life cycle
- risk approval process, reviews, and risk history
- user management: user roles and permissions

New schedule risk analysis features:

- "Risk Drag-n-Drop" interface - easy way to assign risks to tasks and resources
- improved integration with Microsoft Project, Oracle Primavera, and other project management software
- joint confidence level chart
- new hierarchical risk register
- ... and more

Anaheim, California

Partners in Focus

Intaver Institute's education and training partner, the School of Business at George Washington University, offers a Master of Science degree in Project Management. The curriculum balances real-world practice and academic theory, while developing the skills to integrate complex projects, motivate people, and achieve cost-effective results. The degree is offered on campus in Washington, DC or as part of Digital Community, which provides an on-campus experience anywhere in the world without sacrificing quality or professional opportunity.
