Intaver Institute releases RiskyProject v.6 – Project Portfolio Risk Management and Schedule Risk Analysis Software

Nov 25, 2013. Intaver Institute Inc. has announced the release of RiskyProject 6, which includes enterprise project risk management capabilities. RiskyProject 6 will allow organizations to manage their project risks at the program or portfolio level. According to Michael Trumper, a business at Intaver Institute, "RiskyProject Enterprise is the next step in the evolution of our project risk analysis and risk management platform. Our integrated risk register can now be automatically shared across an organization allowing the results of the individual project risk analysis to be rolled up and provide a more comprehensive understanding of project risk exposure across the entire organization. As well as providing our clients an enterprise view of their risks, we have continued to improve the desktop client that p and have added several new features that address performance, integration and reporting."

RiskyProject Enterprise

The new RiskyProject Enterprise allows the user to:

- Manage risks across your entire organization including various projects and programs
- Rank projects based on risks
- Perform qualitative and quantitative project risk analysis for all risks with an organization
- Report results of analysis, save documents related to risks, review and approve risks
- Manage risk mitigation and response plans.

Other new features of RiskyProject 6 include:

- "Risk Drag-n-Drop" interface - easy way to assign risks to tasks and resources
- improved integration with Microsoft Project, Oracle Primavera, and other project management software
- joint confidence level chart
- new hierarchical risk register
- and other schedule risk analysis and cost risk analysis features.
